diviso_{FR}

Partition wall systems from FRENER & REIFER

diviso_{FR} partition wall systems embody an elegant and contemporary design that fits seamlessly into any room concept. They open up a wide range of possibilities for architects and planners to design rooms with almost limitless transparency. The discreet aluminum frame blends harmoniously into the walls, floor and ceiling and creates a perfect balance between **unique aesthetics, elegant simplicity and precise functionality.**

50 years of experience make FRENER & REIFER the ideal partner for outstanding high-quality custom glass constructions. The partition wall system **developed in-house** adapts to individual requirements and offers customized solutions. Thanks to their filigree, modular design, our partitions are equally suitable for new builds and redesigns as well as for large or small spaces. **Professional advice, design flexibility and in-house production are guaranteed.**

Design variants

diviso _^{FR} pivot

Double glazing with safety glass and pivot door

The partition wall system for more privacy: the double glazing enables **higher sound insulation values** and the intermediate space offers an opportunity to integrate **anti-glare or privacy protection systems**.

Glazing

- » Double glazing in ESG or VSG with PVB 0.76 mm
- » Pane thickness according to design
- » Design glass or white glass

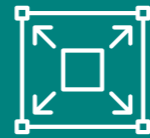

Format

- » Fixed glazing grid dimensions up to max. 1500 mm, H 3400 mm
- » pivoting leaf up to max. W 1500 mm x H 3000 mm, weight up to 150 kg

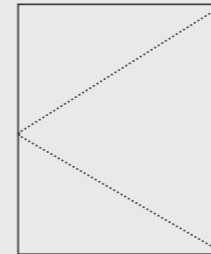

Sound insulation

- » Up to 47 dB (laboratory value)

Customized versions on request

Execution

FRAMES AND PROFILES

diviso^{FR} features frames and profiles in high-quality aluminum. Their sophisticated design conveys a feeling of **lightness and spaciousness**, while the silicone-bonded all-glass walls create a particularly **sleek aesthetic**.

Narrow face widths

Slim profiles give every room a particularly elegant and light appearance.

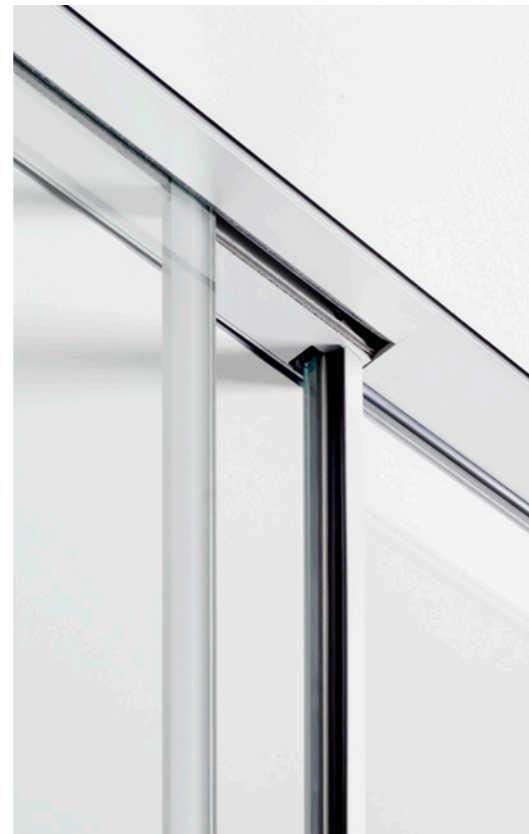

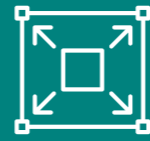

Smooth-running guide system

Stainless steel runners and rails ensure easy, even and noiseless guidance of the sliding doors.

Accessibility

Flush-mounted guide rails integrated into the floor create barrier-free access and are also easy to clean.
