

No interest in standard solution?

Then help to create the world's most extraordinary facades with us!

For our head office in **Brixen** we are looking for a reliable, competent and committed person for

Mechanical Designer

AREAS OF RESPONSIBILITY

- Development of basic details for movable facade parts
- Creation of CAD plans and 3D models
- Creation of design drawings as a basis for workshop planning
- Commercial and structural optimization of technical solutions
- Independent coordination of projects

REQUIREMENTS

- Completed graduate level mechanical engineering studies
- Work experience in the construction sector, preferably in materials handling
- Good Auto-CAD skills
- Experience with 3D planning. Solid Works or Rhino would be an advantage.
- Knowledge of English

WE OFFER

- Flexible working hours with time credits
- Flat hierarchy and appreciation of ideas
- Training opportunities for personal growth
- Various benefits, including fringe benefits
- We pull together: an open, positive working atmosphere unites us on the way to our goals
